THE WALL OF CHINA

In 214 B.C., the Chinese commenced building the Great Wall, which isolated their country from the rest of the world and helped retard their national progress.

The business man who maintains a wall of "dignified reserve" towards the buying public is just as surely retarding his own business growth.

Claresholm Local News

Mrs. Martin Berg is a patient in the local hospital since the 26th.

Born at Claresholm hospital, on September 26 to Mr. and Mrs. Ben Coutts, a son.

Major Schoof is arranging to leave next week for his season's lecture in the States.

Mrs. J. F. Hageness is well on the way to recovering after her serious illness of double pneumonia.

The Calgary Albertan came out Thursday morning with a highly creditable 40-page special Harvey edition.

So far as The Review-Advertiser has been able to learn, Claresholm schools will reopen on Monday next.

The fall change in Canadian Pacific train service has made no alteration in the train times at Claresholm.

Mrs. L. C. McKinney is attending the annual meeting of evangelism and social service of the United church, held in Toronto.

The Claresholm School of Agriculture will open for the fall term on October 26. Announcement appears in another column.

After having their summer holidays the Odd Fellows of Claresholm will resume their meetings on Monday, September 26th, October 3rd.

Claresholm baseball fans are all set for a big Bisten-in over the radio to the reports on the world's championship series of games which start on October 5th.

Billie Dove and Bumble Gordon in "Sensation Seekers" at the Rex theater Friday and Saturday night, the 25th and 26th, at 8:30 p.m. "Egypt" by Ernest Pascal.

Dave Johnson, who has been with Langston & Harvey, has gone to Calgary to take up fox farming with his father, Leslie Stirling, of High River, takes his place in the store.

Mrs. B. J. Remington, of Beaverlodge, has secured an opportunity for apprenticeship in the Claresholm hospital on Tuesday. Mrs. Remington is a daughter of Mr. and Mrs. J. M. Perce.

L. E. Kundi, B.Sc., left on Saturday for St. Paul, for post graduate work at the University of Minnesota. Kundi has for the past summer been busy in this district under the Provincial Weed Control Act.

Rain set in last Friday evening and on Saturday morning turned to wet snow, which fell during the night in sufficient quantity to which the ground. Wednesday rain again set in and continued till Thursday forenoon.

A few threshing outfits started up last Friday in this district. The wheat so far brought in to the elevators grinds tight. Friday evening a storm put a stop to threshing for the time being, and Wednesday's rain again had held up threshing operations.

BARNES—MAXWELL

A quiet wedding was solemnized at the United church parsonage, Claresholm, at eleven Thursday morning September 15, when Mildred Barnes, the only daughter of Mr. and Mrs. C. R. Maxwell, became the bride of Mr. Sidney Alfred Barnes, of the Alberta Provincial Police. Rev. J. W. Dalgleish performed the ceremony.

The bride wore a gown of rosewood crepe-back satin with silk hat to match, and for a traveling costume a grey coat with fur trimming. Mrs. Mildred was the maid of honor and also a sand crepe de chine with a felt hat to match. Mr. H. W. Worendyke supported the groom.

The groom's gift to the bride was a string of pearls to the bride and a topaz and brilliant bracelet, and to the best man a pearl stickpin.

A quiet luncheon was served at the home of the bride.

Mr. and Mrs. Barnes left on the afternoon train for Calgary where they will reside.

The fifth annual Alberta Stock and Feeder Show will be held on October 17th, at Calgary, followed by an auction sale on the 18th, of all entries.

Brooker's Quality Bread

from Saturday 24th
at 10 cents per loaf.

Down in price but not in quality.

CLARESHOLM BAKERY

The Wawanesa Mutual Insurance Company's policy has always been since its organization thirty years ago, to give to its patrons fire protection, at the lowest possible cost, consistent with safety.

And we are pleased to announce that from now on the cash rate on farm buildings will be reduced 25¢ per \$100.00 for three years. This makes our cash rate \$1.25, or \$1.00 per \$100.00 if your house has lightning rods and basement chimney.

Our assessment note plan requires no money down. And this year the rate is fixed at 20% or 4¢ per \$100.00 for one year.

S. L. FRASER & SON

ALBERTA CROP REPORT

(Issued by the Department of Agriculture, Government of Alberta.)

Edmonton, Sept. 26. The delay in harvesting and threshing operations occasioned by the fall of rain and snow on Friday and Saturday will be very slight and with a continuation of the present favorable weather, work will be resumed within a few days, according to reports reaching the Department of Agriculture. The snowfall was heavier over the northern half of the province, but sun and wind are rapidly drying stocks and damage to crops under field is anticipated.

Cutting of wheat has been practically completed over the province by midweek of the past week, and rapid progress has been made in threshing good grain. Lodging has occurred in some fields as a result of the snowfall, and this will delay the completion of cutting in some cases. The crop will be made with threshing in a number of districts and some exceptionally good yields have been reported. Most of the wheat threshed so far is grain No. 2, but the percentage of good grain is sufficient to justify a warning to farmers not to be unduly anxious to thresh before stocks have dried thoroughly.

In the southeastern part of the province the weather has been dull, but rain did not stop threshing and good progress is being made in cutting and northern sections which was completely tied up but present indications point to a resumption of threshing operations about Wednesday. In the Grande Prairie, Peace River and Spirit River districts work is expected to begin again by the middle of the present week.

Little difficulty is reported in seed stocks, and the machines are plentiful throughout the province so that with favorable weather little time will be lost in putting Alberta's record crop into marketable shape.

Paralytic Plague Cuts Wide Swath in Europe

London, Sept. 27.—An epidemic of the paralytic plague is ravaging a wide area of Europe, from Rumania to England.

It originated several weeks ago in Rumania and spread westward into Hungary, Austria, Poland, Germany and Great Britain. Austria, Bulgaria and Yugoslavia have escaped thus far, while in France and Italy the number of cases has not been above normal.

The disease is worst in Rumania and Germany. The fatality is 3 per cent.

Opportunities For Britain In Canada

Great Britain has a problem and Canada has a problem, one being the exact opposite of the other. In the British Isles there is a surplus population for which employment cannot be found. In Canada there are enormous resources and vast areas of fertile lands which call for increased population to underlie their development may take place. The Old Land has too many people.

Looking at the face of this, it would seem to be a comparatively simple matter for the British and Canadian Governments to evolve policies under which the surplus population of Great Britain could be transferred to the open spaces of Canada, thus solving the problems of both countries. But the solution is not so easy, in fact, it is most complex and difficult.

The chief problem is that the British are a highly agricultural race, men and women who will go on the land. True, they do not have had actual farming experience to be welcomed and to succeed, but they must be of a class which is likely to make good on the land.

Great Britain, however, has no large surplus of this type. If, indeed, and for all that, the British should be willing to found a colony in the workingmen, artisans and laboring men and women, because they cannot obtain steady employment, are obliged to accept the Government doles. Opportunities for the employment of any large number of these people in Canadian industry are small, and it would be most unwise to let them come to Canada where their surplus would have an enormous effect on the Canadian market with their creation of a Canadian situation not unlike the present one in Great Britain.

The efforts of both the British and Canadian Governments are, therefore, confined to the training of a limited number of immigrants for agricultural purposes. The poor people left on their farms in Canada. Welcome as these efforts are, the result of the respective British and Canadian problems of surplus and insufficient population is almost identical.

There would seem to be a greater hope of making an effective contribution towards the solution of this joint problem in the adoption of the idea which has been urged of late, namely, that the great captains in British business should build plants in Canada in order to enable them to successfully compete in the growing Canadian market with their United States rivals and that they shall these build plants with their own workmen on the British Isles.

The general adoption of such a policy would result in profitable investments by British companies which would have the advantage of utilizing the resources of the Dominion, would help to adjust the balance of trade as between Canada and the United States, would ease the unemployment situation in the Old Land, and would increase the productive capacity, the prosperity and wealth of the Empire as a whole.

It is to be hoped that the industrial leaders of Great Britain have had to face enormous difficulties during the last year. They have borne an axe still bearing heavy burdens. They may justly feel that the present is not the time to launch out on new and untried ventures. The situation is, however, that only through the adoption of heroic measures, will employment in the old land be relieved and restored, and that will bring to British industry. War-time existing conditions, British industry is looking out in the Canadian market. An effort should be made to hold and strengthen their position here before it is too late.

It is gratifying to note that one big British concern has decided on a general underwriting of the Canadian market. Some sensible men have been on the British market. Interest companies of millions of dollars have made finally concluded arrangements for the utilization of Southern Saskatchewan lignite coal in the carbaking art of bringing of this fuel on a large commercial scale and will within the next few months invest huge amounts of dollars in the enterprise.

President Roosevelt and his cabinet, A. P. A. During have both been urging the adoption of this big business policy upon the British manufacturer, and it is to be hoped that so astute a business man as President Stanley Baldwin himself a big manufacturer, will see the advantages to Britain to Canada of the Empire of such a policy, and urge its adoption upon his fellow manufacturers in the British Isles.

Would Help Aviators

Says Pre-War Days

Will Never Return

Towns Should Show Their Name Readable From Air

Russian Prince Hints German Monarchy Is Gone Forever

British aviation authorities say the time has come when it is high time to erect signs with the names of the towns visible to casual airmen who hop the Atlantic nonstop, the silent pilot of navigation instruments and maps.

The request of Edward P. Schieff and William S. Brock, in the Pribilof Islands, that the inhabitants of the little South coast resort of Beaton spell out the name of the town and county in which they live, so that visitors would know what country they had reached, will go down in history as one of the strangest questions ever asked in England.

Richard's Liniment relieves backache.

Manitoba's Minerals

Current activities in the interlaced areas in southeastern and northwestern Manitoba indicate that the province is not only a rapidly growing producer of gold and possibly an important source of copper and zinc.

Disfiguring Blemishes Healed by Cuticura

Daily use of Cuticura Soap, assisted by Cuticura Liniment, will remove soot and stains, soothes and heals unsightly and annoying blemishes and irritations on neck and face, and tends to prevent new formations. Nothing can put more confidence in one's self than satisfaction that this greatest emollient and restorative has been used.

Sample Pack Free by Mail. Address Canadian Department, Cuticura Liniment Co., 1000 Broadway, New York. Canada: Shaving Stick 25c.

Speaks Several Languages

Secretary of State for the Dominion, First Linguist in British Cabinet

Mr. L. C. M. Amery, the Secretary of State for the Dominions, is unquestionably the most linguist in the present British Cabinet. He speaks several languages fluently as well as European languages.

When in Satoria, Sir George Milne, or "Uncle George" as the C. in C. was invariably called, once told one of his staff, "I am not a Greek." The official replied that he did not, but that he had a good knowledge of Greek and also that he knew a man who was supposed to be quick in picking up languages. "Can you get the hang of it by next week?" asked Sir George. "Oh, certainly," was the reply. "You seem very confident," said Sir George. "Well, you can write it." replied Captain Amery.

Figures in opposition to Mr. McEwen's submissions to the Board were filed by counsel for the railroads. Mr. W. H. McEwen, Saskatchewan's counsel, told the court, "The position was correct and a two million dollar saving annually to this province alone would accrue in a normal year."

The figure is antibiotic and was proven at the hearing at the freight rates probe held this spring. Saskatchewan's counsel, W. H. McEwen, K.C., told the court, "It is his argument for lower rates in the future."

 252. The Importance of the Potato Crop?

Correct answers given next week. See how many you can answer by that time.

ANSWERS TO LAST WEEK'S QUESTIONS

239. Why and How Do Plants Turn Toward the Sun?
 Plants adjust themselves to their environment. When a growing plant receives more light on one side than another (as a potted plant in a window) the stems and leaves slowly twist toward the light. If an upright stem is illuminated more on one side, the opposite side grows faster, causing the stem to curve in a direct line with the incoming light. An unequal swelling in leaf joints causes leaves to place themselves directly across the light path. Some authorities believe the direction of the penetrating light rays the primary factor; others that their unequal intensity causes chemical alterations in the plant cells.

240. What Is Perpetual Lumber?

For 300 years we have been prodigal in the use of our timber; now using it four times as fast as we grow it; and allowing thousands of acres to burn every year besides. There are today in the U. S. 811 million acres of barren, fire-swept wilderness, once forest-covered, with prosperous towns and villages. This condition cannot continue; forest industries must grow their future raw material or pass out of existence. The country is beginning to take reforestation seriously. Many large lumber companies and wood-using industries now have nurseries and are managing their properties with the idea of a continuous production of timber.

241. The Great Utility Value of Electric Transformers?

Electrical energy transmission requires high voltages, but for ordinary use and for safety these must be greatly reduced at points of distribution, sometimes 500 to 1,000 times. This stepping down in voltage is done by the transformer, essentially, in which it is wrapped with two closely-wound coils of wire, the inner coil the secondary winding, the outer coil the primary winding, each connected with a separate circuit. Current from the power line passing through the primary winding creates a current in the secondary winding as much reduced in voltage as the number of turns of wire in the secondary coil exceeds those in the primary coil.

242. What Is Silicon Steel?

In transformer operation the rapid reversal of magnetism in the core wastes considerable energy as heat. Silicon steel contains 2 to 3 per cent silicon, a nonmetallic element similar to carbon. This steel has remarkable magnetic properties, exceeding that of iron by at least one-third. Since 1900 hundreds of thousands of tons of this steel have been

manufactured, mostly in thin, laminated plates for transformer cores. It is claimed that since that time it has saved enough money to build the Panama Canal, and is eliminating a waste of five million tons of coal annually.

243. The World's Largest Hydro-Electric Tunnel?

A giant unit has been added to the water-power system of North America by the completion of the Florence Lake Tunnel, 103 miles northeast of Fresno, California—15 feet in diameter, 13 miles long, bored through solid granite; is the world's longest tunnel. The upper waters of the San Joaquin river are impounded behind a 120-foot concrete dam, creating a storage basin with capacity of 60,000 acre feet. Water from this reservoir is diverted under the mountains by way of the tunnel, thence to Hetchet Lake, and through a number of power stations, which stretch for 20 miles down the Grand Canyon of the San Joaquin.

244. How Is Modern Tunnel Construction Speeded?

Large tunnels are now generally constructed by boring a small tunnel, known as a "bore tunnel," parallel to the main tunnel, and close to it, so cross-cuts can be made to the main tunnel at intervals and work begun on the main tunnel as soon as possible. The pioneer tunnel is used as the main tunnel for ventilation and the transportation of power and light. In this way the completion is sometimes speeded up as much as a year. The interior of the tunnel is not yet lined in a project of this magnitude frequently amounts to \$1,000 to \$2,000 per day, time is a very important factor.

245. The Speediest Ocean Cable?

The cable recently laid between New York and Fayal (Azores) carries 1,400 messages a day, a capacity of 1,200 letters per minute, as against a 300 maximum for the standard type of cable. This has been accomplished by wrapping the copper conductor throughout with a special insulation (in tape form) of the newly developed alloy "permaloy," 78.5% nickel, 21.5% iron. This compound has the highest magnetic properties of any material known—80 times as magnetic as soft iron; reduces electrical resistance to a point where legible signals can follow each other at a speed never before possible.

CANADIAN PACIFIC CROP REPORT

Winnipeg, Sept. 26.—With the exception of small areas in southern Alberta and some late oats and flax in all three of the prairie provinces, grain crops in western Canada have been cut, according to the weekly report of the agricultural department of the Canadian Pacific Railway, issued today.

Harvesting was carried on last week under favorable weather conditions and threshing began in general, but Saturday last rain and snow was general over the west, causing another delay. For day the weather is favorable and operations in the harvest field should be general again by this afternoon or by Tuesday at the latest.

Taking into full consideration the damage resulting from frost, rust and late frost, the harvest is generally considered very satisfactory.

Alberta was poor in Manitoba, but fairly good in Saskatchewan, and Saskatchewan was fair. Damage from frost was not, however, as bad as expected. The first two games will be played in the park of the National league pennant, winner—Pittsburgh. St. Louis or New York, ad the next three games will be played in the New York Yankees' park.

If more than five games are necessary to decide the world's championship the sixth and seventh games will be played in the park of the National league club. If played at St. Louis, the contest will start at 1:30 central standard time, but if both clubs are in the east the contest will be at 1:30 eastern time. A Sunday game, if played in New York will start at one minute after two.

In British Columbia winter

is approaching, but the rain is less than all grains are considered. Approximately 20 per cent of the Saskatchewan wheat has been threshed with the exception of all grain growing in Alberta is behind other prairie provinces in wheat threshing, the date to be put at about five per cent in the report.

In British Columbia winter

is approaching, but the rain is less than all

grains are considered. Approximately 20 per cent of the Saskatchewan wheat has been threshed with the exception of all grain growing in Alberta is behind other prairie provinces in wheat threshing, the date to be put at about five per cent in the report.

THE REVIEW-ADVERTISER, CLARESHOLM, ALTA

A Lady always has a greater admiration for The Gentleman who has his shoes polished with...

"NUGGET" SHOE POLISH

There's a "Nugget" shade for every shoe made.

WORLD HAPPENINGS BRIEFLY TOLD

The first text cable appeared in the streets of Jerusalem recently. It contained a vast amount of erotica.

An invitation to visit China to promote aviation has been extended to Col. Charles A. Lindbergh, New York pilot. Lindbergh said he might accept.

More and better immigration, from Canada is the prospect for 1928. W. J. Egan, deputy minister of immigration, declared on his return from a European tour that he had more than three million.

Vicomt Gifford of Clewood, has definitely resigned his cabinet post as chancellor of the Duchy of Lancaster, and will not go to Geneva for the meeting of the League of Nations Assembly.

Archibald Joseph Noel, the third Earl of Garsfield, private chamberlain of St. Edward and Cape to Pope Pius XI, and Pope Pius XI, and former attaché at the British embassy in Washington, died Aug. 27. He was 62 years old.

The Sobhars Settlement Board, which has handled the placing of returned men on the land, will be incorporated in the Land Settlement Board in the fall. The board, which the Hon. Robert Fiske, minister of immigration, has recommended.

For having set fire to a stack of hay containing about 32 loads, he is being held by the employer, a young man named Mountain, a recent arrival from the U.S. He is to be tried at Wimborne, Ont., to serve one year in the Gaol of the reformatory.

The University of Toronto, conferred its highest honor, the degree of Doctor of Laws, honoris causa, upon Prof. Lord Stewart of Bury, Lord Chancellor of England, at a special convocation in Convocation Hall, Toronto.

Between 250 and 260 people have been killed and more than 2,500 injured in less than 18 months past as a result of religious conflicts between Hindus and Moslems in the provinces of India. Lord Irwin, the viceroy, stated in addressing the legislative assembly at Simla.

John B. Simpson, a British scientist, has left Edinburgh, Scotland, with his wife and son, making his home in Amherst for three months. He was accompanied by a Samoyed dog. "My purpose," said Simpson, "is to gather material for a book on the ice fields."

A Valuable Hen

An offer of \$1,000 for the famous hen No. 6 or \$2,000 for a pen of ten birds including this world record layer was turned down by the University of British Columbia on account of the great value of the bird for breeding purposes.

Buildings lined with wood are better for reproducing sound than with wall of other material.

A bunch is one of the few things that cannot be commercialized.

Diarrhoea Summer Complaint HE ALWAYS USES

Mr. T. F. McGregor, McLeanian Alta, writes: "I am 70 years old, my mother used to give me Dr. Fowler's Extract of Wild Strawberries for diarrhoea and I have never had diarrhoea since. Years since then when troubled with an excessive loss of the bowels I have had the same extract and have had the same old, reliable remedy and it has given me the desired effect, no matter what the cause is."

Don't Accept a Substitute

This valuable preparation has less than 10 per cent of the extract in only by The T. Miller Co., Limited, Toronto, Ont.

Treasures Hidden In Desert

Many Caves Buried Under Drifting Sand During Centuries

It is not generally known that the Sahara Desert has encroached hundreds of miles eastward during the centuries since the great days of Egyptian civilization.

Many cities and centres of population once on the floor of the ocean, but the treasures buried under desert sand have also been discovered.

A sectional discovery was made recently, not on the Egyptian side where the sand almost succeeded in overwhelming every great city, but in the western part of the North.

The body of Queen Salome, wife of King Herod, was found beneath the sand. On her arms were eight bracelets, nine of gold and nine of silver; five necklaces of jewels were round her neck and on her head was a diadem of gold studded with jewels.

There was much exquisitely carved furniture in the tomb, and near were piles of jewels, ear-rings, rings, and boxes, and a large number of coins.

There was found a superb statue of a tomb in stone. The date of this tomb is placed at least a thousand years before the Christian era.

The status of aviation in Japan is not as yet well known. The Japanese are not yet able to fly, but the Japanese are learning to fly.

The best Japanese achievement in the field of aviation is the 1925 flight to London via Siberia made by two civilian fliers.

Among the reasons advanced in Japan's backwardness are: the lack of courage but lack of initiative and enthusiasm for the art of flying which characterizes the English, Chamberlain and Erwin.

The Japanese are "unimaginative" and their progress is slow.

For example, they seem to fail at

making their motor start readily.

Thirdly, official regulations hamper practice for the air above Japan.

There is no law in Japan

against the use of gasoline.

These facts reveal how much remains to be done before a Japanese aviator can wing his way to Seattle.

Motor Penetrates Far North

English Woman Breaks Distance Record By Three Miles

The British motorist, who has just now started the record breaking for "farthest north" is now in the motor car, was turned back when 279 miles within the Arctic circle by swampy conditions, arising from the intense heat.

The Hon. Mrs. Victor Bruce and party, who have returned to London after a 6,000 miles' trip through Northern Europe to Finland and Lapland, have just started the record for the North, and any previous tourist has penetrated, and got within to miles of the North Cape.

She averaged 275 miles a day for 8 days, and on the 9th, the journey was over, each mile being gained through the enterprise.

The enterprise was undertaken partly with the object of inspecting the roads of Sweden on behalf of the Automobile Association, and partly partly for the sake of ad-

venture.

Mrs. Bruce was accompanied by her husband (a son of Lord Aberdare), "One of my great ambitions," said Mrs. Bruce, "was to be able to drive a motor car to the North Cape, and the swamps in Northern Lapland prevented us from getting to the coast at all. We were fully prepared for very cold weather, the average temperature in the Arctic areas which we traversed is about 56 degrees in the shade at this time of year."

"It is not so strange when you think of it for the summer is in progress, and the temperature is rather remarkable to observe the extent to which the motor is penetrating into the Far North of Europe, and I anticipate that within a very few years roads will be available for tourists right up to the North Cape."

The car was much exquisitely carved

furniture in the tomb, and near were piles of jewels, ear-rings, rings, and boxes, and a large number of coins.

There was found a superb statue of a tomb in stone. The date of this tomb is placed at least a thousand years before the Christian era.

Mining Men Go To Europe

Will Investigate Treatment Of Coal For By-Products In Germany

Hon. Charles Stewart, minister of mines, and Dr. Charles Blaser, mining minister, have been sent for Europe. Mr. Stewart is one of the Canadian Government's representatives to the League of Nations conference at Geneva.

After the sessions of the League are over, Mr. Stewart will visit many of the industrial areas of Germany and England for the purpose of investigating the progress made in the past few years in the treatment of lignite and bituminous coal for by products in Germany.

He will also visit the coal mining areas in Germany, where he has witnessed the use of coal as a fuel.

Mr. Blaser, who was originally from the U.S., will visit the coal mining areas in Germany, where he has witnessed the use of coal as a fuel.

Very Likely Did Julia Parker Was Seen on Broad

way the other day, when it was warm, wearing a fur piece around her neck.

"My goodness!" said a friend. "How can you wear a fur in the summer?"

"Well," replied the dancer, "the woman who wore it originally used it in the summer, didn't she?"

First Shipment Of Antelope

The first shipment of antelope from Canada to the U.S. was made at an early date, Charles Blaser, rancher, at Lake Head, has contracted to deliver 22 head of antelope to a Texan rancher.

Twenty cents the pelt.

The first two pelts in the lot, joined to the head, were 13½, 15, 16, 16½, 17, 18, 19, 20, 20½, 21, 21½, 22, 22½, 23, 23½, 24, 24½, 25, 25½, 26, 26½, 27, 27½, 28, 28½, 29, 29½, 30, 30½, 31, 31½, 32, 32½, 33, 33½, 34, 34½, 35, 35½, 36, 36½, 37, 37½, 38, 38½, 39, 39½, 40, 40½, 41, 41½, 42, 42½, 43, 43½, 44, 44½, 45, 45½, 46, 46½, 47, 47½, 48, 48½, 49, 49½, 50, 50½, 51, 51½, 52, 52½, 53, 53½, 54, 54½, 55, 55½, 56, 56½, 57, 57½, 58, 58½, 59, 59½, 60, 60½, 61, 61½, 62, 62½, 63, 63½, 64, 64½, 65, 65½, 66, 66½, 67, 67½, 68, 68½, 69, 69½, 70, 70½, 71, 71½, 72, 72½, 73, 73½, 74, 74½, 75, 75½, 76, 76½, 77, 77½, 78, 78½, 79, 79½, 80, 80½, 81, 81½, 82, 82½, 83, 83½, 84, 84½, 85, 85½, 86, 86½, 87, 87½, 88, 88½, 89, 89½, 90, 90½, 91, 91½, 92, 92½, 93, 93½, 94, 94½, 95, 95½, 96, 96½, 97, 97½, 98, 98½, 99, 99½, 100, 100½, 101, 101½, 102, 102½, 103, 103½, 104, 104½, 105, 105½, 106, 106½, 107, 107½, 108, 108½, 109, 109½, 110, 110½, 111, 111½, 112, 112½, 113, 113½, 114, 114½, 115, 115½, 116, 116½, 117, 117½, 118, 118½, 119, 119½, 120, 120½, 121, 121½, 122, 122½, 123, 123½, 124, 124½, 125, 125½, 126, 126½, 127, 127½, 128, 128½, 129, 129½, 130, 130½, 131, 131½, 132, 132½, 133, 133½, 134, 134½, SHIP YOUR GRAIN TO McBEAN BROS. The Old Reliable Firm Of

Write us for information regarding the markets. We will say now that so far as we can see the world's conditions warrant high prices for this year's crop, and if your wheat is handled intelligently we can see no reason for the farmer taking less than \$1.00 a bushel, and the possibilities are for a great deal higher price. The big shortage in the corn crop in the United States is a very bullish factor for our coarse grains. Give us a trial. We are licensed and bonded. Reference: Bank of Nova Scotia.

PAINTED FIRES

BY NELLIE L. MCCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER VII.—Continued
Deep seal in the courtroom was filled. It is not every day such a thrilling case can be offered to the unemployed public. A young girl, pretty and vivacious, from the Chinese den with hidden tables in her possession, who refused arrest, fighting like a wild cat, inflicting an officer, and now refusing to say a word, is no ordinary attraction.

The public was reserved for the purpose, however, and the spectators. There was going to be a great show. Men with blue-black whiskers—hawking through the skin of their faces; women with a button or two, discarding hats and weedy youths, plump of tawny shoulders, older men with veiny noses and heavy brows, bowed down to their little old citizens; eager-faced girls, red-cheeked, and the boudoir-type, hungry for sensations to fit their idle days; fat dwellers, bargain hunters, operators, newsmen, law-abiding virgins, gay trollops, and the cynical and jesting. Their liberty was sweet to those women this morning when contemplating the prospect of another woman's possible fate. It gave them that pleasurable thrill of community vice.

The Press table was full. I looked like a bird in heat story, — real thrill stuff—, but my eagles youth.

Heil's case was the first called. The police nation brought her in and sat with her. The face was pale, but there was no shrinking or fear in her eyes, and the eager crowd, whose eyes were fixed on her, could not help the smiley satisfaction of the spectators. Her friend would have come if she were well enough, Heil thought, and again her rage kindled against the fate which presented her from time to time the very best of her friend had had her to do. She would know, though, that it was through no fault or carelessness of hers that she had died of lack of that much needed oxygen in her system. Her friend would have died and there was no one she could ask. She must not ask, because the trouble in her heart as she faced the crowd with her hundred eager searching eyes.

Under a glass roof, suspended by chains from the ceiling, sat the magistrate, alert, eager. He would see if the Finn girl would run out to answer his questions, and he could get a thing of the fear of the law into her. These Finn girls! He knew them; he'd had enough trouble with them?

TO WOMEN OF MIDDLE AGE

Mrs. Wilson's Experience
A Guide to Women Passing
through the Change of Life

Hamilton, Ontario.—"They tell me several bottles of Lydia E. Pinkham's Vegetable Compound are not speak to highly of it as I am. I have had a great deal of life and was all round and in good health. I was very weak and had a pain in my kidneys. We were so bad I could not get out of bed. I had not a friend in the world, and had not a friend on earth. I did not know what to do. I died. I was very nervous, too, and did not sleep at all. A friend advised me to try a bottle of Lydia E. Pinkham's Vegetable Compound, so I did. I took it every day. It always worked hard until lately, and was in bed for two months. I began to feel better, but not much, so I took another bottle and I recommend it with great success. Also Lydia E. Pinkham's Vegetable Compound is a good answer to letters from women asking advice, as I cannot see any higher authority than Mrs. Emma Wilson, 471 Wilson Street, Hamilton, Ontario."

Sold by druggists everywhere.

W. N. L. 1925

The police officer gave evidence and identified Heil. The one with him in a sling told his story. "The girl appeared to be very frightened, but did not understand that she was arrested. Your Worship, I think, I am telling the truth."

"I am not so convinced that this girl appears to be frightened," Englishman snarled. "She is dead. Heil has been here only a few months. If our society is in the state you say—"

"Give your evidence, Sir," interrupted the magistrate, "this is a court of law, you are not preaching, reverend."

"The girl is doing an honorable thing," continued the minister. "She is suffering for some other person's misdeeds, and she has gone to San's place for company. I know the girl; she is honest and innocent."

"Her Rev. then, she? No one is stopping her. Let her clear herself," he says, too."

"The crowd in the gallery were surprised. "Yes, that name is well known in this court. I had the pleasure—point to be decided, and she can save herself a lot of trouble now if she will tell us the whole story."

"I am not so inclined that this girl appears to be frightened," Englishman snarled. "She is dead. Heil has been here only a few months. If our society is in the state you say—"

"Give your evidence, Sir," interrupted the magistrate, "this is a court of law, you are not preaching, reverend."

"The girl is on her feet in a moment—"Your Worship?" she began.

The magistrate ordered her to sit.

"I demand to be heard," said Miss Rodgers. "An injustice is being done to me."

"All good time," said the magistrate sternly. "You will not be a chance to speak, but you cannot interrupt this court."

There were murmurings in the gallery. The police officer righted his chair in her presence. "Wang, the Chinese professor of orthodontics in the Columbia school of dental and oral surgery, in a report sent to the Labrador coast, where he is carrying on research with the Eskimo tribes in Northern Labrador and the Ungava Bay region."

Eskimos made grateful patients when their dentists are once gained, said Wang. The Chinese professor brings smile to the faces of all of us.

After he had extricated teeth from a group of Labrador Eskimos, including four women and five men, they said smile to each other with a broad defiance. She would get rid as sure as she was an inch high, and when she came out she couldn't pull that stuff in again. Girls just out of jail were not to be trifled with, the girls' guard said. "I didn't have time," the girls' guard said. This attitude is characteristic of all his Eskimo patients.

"Now, I want you to speak," the magistrate said slowly, and speaking with growing distaste. "I see you are trying to make out a case. You seem to think I am too tough to make understand. You are either an old hand at this business, young and innocent as you look, or you are hiding something. You must speak. Just say the name of the person who sent you to San's for me to decide."

Again the interpreter spoke to her, and the crowd waited.

"Hold! Shut your head."

Again the interpreter spoke to her, and the crowd waited.

"I am a young man, I am told, and the crowd waited.

"Again the interpreter spoke to her, and the crowd waited.

"I am a young man, I am told, and the crowd waited.

"Again the interpreter spoke to her, and the crowd waited.

"I am a young man, I am told, and the crowd waited.

"Again the interpreter spoke to her, and the crowd waited.

"I am a young man, I am told, and the crowd waited.

"Again the interpreter spoke to her, and the crowd waited.

"I am a young man, I am told, and the crowd waited.

"Again the interpreter spoke to her, and the crowd waited.

"I am a young man, I am told, and the crowd waited.

"Again the interpreter spoke to her, and the crowd waited.

"I am a young man, I am told, and the crowd waited.

"Again the interpreter spoke to her, and the crowd waited.

"I am a young man, I am told, and the crowd waited.

"Again the interpreter spoke to her, and the crowd waited.

"I am a young man, I am told, and the crowd waited.

out reforming the world, and the girls are on the street or in their clubs. I blame the ethi— and the city police, who are not good to the young people, for the home has gone. I tell you, there's no religion in the homes any more, no respect for law—nothing but birth control, political clubs, bridge clubs, while the young girls and boys steal cars, joy ride and snuff dope. There you are!"

The old dwellers were enjoying it. They did not belong to the women's organizations, so he didn't mean them.

Mr. Terry came forward and asked if he might give evidence.

"This girl's mother cannot be found," said the magistrate. "She has been here only a few months. If our society is in the state you say—"

"Give your evidence, Sir," interrupted the magistrate, "this is a court of law, you are not preaching, reverend."

"The girl is doing an honorable thing," continued the minister. "She is suffering for some other person's misdeeds, and she has gone to San's place for company. I know the girl; she is honest and innocent."

"Her Rev. then, she? No one is stopping her. Let her clear herself," he says, too."

"I am not so inclined that this girl appears to be frightened," Englishman snarled. "She is dead. Heil has been here only a few months. If our society is in the state you say—"

"Give your evidence, Sir," interrupted the magistrate, "this is a court of law, you are not preaching, reverend."

"The girl is on her feet in a moment—"Your Worship?" she began.

The magistrate ordered her to sit.

"I demand to be heard," said Miss Rodgers. "An injustice is being done to me."

"All good time," said the magistrate sternly. "You will not be a chance to speak, but you cannot interrupt this court."

for Economical Transportation

3 years from today You Will Know

YOU would require three years of arduous day-to-day driving to know as much about Chevrolet performance and endurance as the General Motors Proving Grounds brings out in a few months.

There's strength, economy, ruggedness built into every model of the Chevrolet. You can know it all by Fisher: into every detail of its powerful engine.

After three years of free driving, you will know that Chevrolet has added to its economy, its smoothness, its power and its beauty, the greatest amount of driving endurance ever possessed by any low-priced car.

Ask your Chevrolet dealer for a demonstration.

PRIZE FIGHT WAS FATAL EXCITING

Detroit, Sept. 23. Three men are dead here of excitement caused by the Dempsey-Tunney fight. James T. Dempsey, 54, dropped dead at his home with friends who he was cheering in the seventh round. The same round, coming by radio, was unfinished for Theodore J. Carrow, 60, who stopped to hear the fight in the floor and died immediately. Harry Koenig, 62, died during the seventh round while listening to the radio returns in a bowling alley.

Troy, N. Y., Sept. 23. Seized with a heart attack while listening to radio accounts of the Dempsey-Tunney fight, Richard O'Connell, 51, died a few hours later.

Albion, N. Y., Sept. 24. George J. Judy, 59, died in the Ellis hospital after collapsing on the street enroute home from listening to the fight returns.

The New York Times reported last night Reuben J. Glick, borough solicitor of Sharonkin, Pa., and Charles F. Brown, of Watertown, N. Y., died in front of their local speakeasies. The latter, aged 62, collapsed while Tunney, for whom he was a booster, was taking a count of nine in the seventh round.

Bridgeport, Conn., Sept. 24. Arrangements are being made for the funeral of Joseph M. Delian, who died early today after becoming wildly excited at hearing the Dempsey-Tunney fight returns over the radio last night.

Aligona, Iowa, Sept. 25. Spen- cer Crowder dropped dead yesterday after listening to the Dempsey-Tunney fight, while listening to the returns. He held several offices in the town government, including justice of the peace.

A New York City police officer, Newbern, was discharged from Bellevue hospital today after physicians extracted half a toothpick from his esophagus. Newbern, 23, swallowed the toothpick while listening to the referee's count round. Tunney, by radio in the seventh round.

Los Angeles, Calif., Sept. 24. Two men died, and another was seriously injured in California fires caused by the Dempsey-Tunney fight. James K. Bishop, 77, was sickened and died during reports of the seventh round, and George A. Johnston died at Venice while listening to radio returns. He took a bus to the hospital with an ice pick stuck in his back. He said he got it while cheering his favorite in front of a bulletin board.

Louisville, Ky., Sept. 27. Oscar Barnes, 52, a paralytic, and William Casey, 62, who has only one arm, are in a serious condition at a hospital today. Barnes suffered a fractured neck, vestor, and a partially crushed liver, a throat with a razor. Casey beat Barnes over the head with a wagon spoke. The two men were againing over the Dempsey-Tunney decision.

Maple Nut Cake and Chocolate Layer

THIS unusual, economical, cake, Maple Nut Cake, will keep fresh for several days, and the Chocolate Layer Cake, made in a little different way with Dr. Price's Cream Baking Powder, is a family favorite too. Try one or both of them today!

(All measurements for all materials are level.)

MAPLE NUT CAKE

1/2 cup shortening
1 cup sugar
2 eggs
1/2 cup milk
1/2 cup flour
1/2 teaspoon salt
2 teaspoons Dr. Price's
Cream Baking Powder
1 cup chopped nuts—preferably
pecans
1 teaspoon vanilla extract

Cream shortening, add sugar slowly and yolks of eggs and milk and flour. Mix well. Add nuts, fold in beaten white of eggs. Turn into greased pan. Bake in well heated oven 15 to 20 minutes. Turn out and cool. Spread with cream cheese and sprinkle with chopped nuts while still soft.

Made from Cream of Tartar, derived from grapes. Raises the dough perfectly, gives the food fine texture and rich flavor.

1/2 cup shortening

1 cup sugar

2 eggs

1/2 cup milk

1/2 cup flour

1/2 teaspoon Dr. Price's

Cream Baking Powder

1/2 cup nuts

1 teaspoon vanilla extract

Cream shortening, add sugar gradually and yolks of eggs and milk and flour. Mix well. Add one-half the flour which has been mixed with Dr. Price's Cream Baking Powder; add remainder of flour, then remainder of flour and flavoring. Turn into well greased layer cake pan. Bake in well heated oven 15 to 20 minutes. Turn out and cool. Spread with cream cheese and orange peel. Spread between layers and on top of cake.

CHOCOLATE FILLING
AND ICING

1/2 cup confectioner's sugar

1/2 cup water

1/2 cup vanilla extract

2 ounces untempered chocolate

1/2 cup orange peel

To sugar add water very slowly to make a smooth paste. Add vanilla extract and chocolate. Turn into well greased layer cake pan. Bake in well heated oven 15 to 20 minutes. Turn out and cool. Spread with cream cheese and orange peel. Spread between layers and on top of cake.
